“Optimize Your Fleet with Seamless Control and Insight”

SMART FLEET MANAGEMENT SYSTEM

 www.capulustech.com

 /capulustech

Discover a new level of efficiency with our advanced Fleet Management System (FMS). Designed to provide clear control and insight, this system simplifies managing vehicle fleets. With features for real-time tracking, route optimization, and detailed reporting, the FMS helps improve operations, cut costs, and ensure compliance with regulations. Experience how this easy-to-use technology can enhance fleet management and deliver tangible results.

About Us

Capulus Technologies is a Private Limited Software Firm dedicated to helping companies, industries, institutions, and government entities manage operational complexities through smart technology solutions. Since its founding, Capulus Technologies has upheld integrity, followed a people-oriented approach, and contributed to society whenever possible. The company remains committed to the principle of "client first" in delivering reliable and effective services. With practical knowledge and rich experience, Capulus Technologies provides comprehensive IT services to clients across various sectors, from small businesses to government departments. The team's domain expertise has enabled the successful development of software applications tailored to the specific needs of both Government Departments and Private Companies. The company has received a Certificate of Recognition under the Startup India and Startup Karnataka initiatives.

Services to Police and Government Departments:

Capulus Technologies developed the **official Karnataka State Police (KSP) App**, implemented statewide and launched by the Hon'ble Chief Minister of Karnataka. The company also created and implemented a Comprehensive Smart Policing Platform named **"M-CCTNS."** This platform assists with Crime Mapping and Analytics, Black Spot Identification, app-based Criminal Record search, Missing and UDR notifications, Arrest Coordination, and portable fingerprint identification. This application was also launched by the Hon'ble Chief Minister of Karnataka.

The Forensic Laboratory Management System (FLMS), a customized ERP solution for FSLs, is used by the State FSL and regional FSLs of Karnataka for end-to-end forensic case management. The company also implemented **Safe Connect** - an advanced emergency and incident response platform enabling real-time video calls with command centers, live location tracking, and instant incident reporting, part of the Bengaluru Safe City Initiative. Additionally, Capulus Technologies developed the Karnataka State Excise Department e-Services for Licensing and Permits, operational across Karnataka.

Key Features

Dashboard

The Dashboard offers a comprehensive view of your fleet's current status with real-time data on vehicle speeds, alert statistics, and live tracking. It aggregates overall fleet metrics and highlights the latest alerts, providing a clear and intuitive interface for monitoring.

Fleet Management

The Fleet Management module is designed to handle all aspects of vehicle operations. It includes features for scheduling trips, tracking vehicles in real-time, and managing detailed records of vehicle types, routes, fuel expenses, and maintenance logs.

IAM (Identity and Access Management)

IAM controls access to the system by managing user roles and permissions. It allows for the secure addition and modification of user profiles, including staff and vendors, ensuring that only authorized individuals can access sensitive information.

Events

The Events module handles the tracking and management of various alerts related to fleet operations. It includes features for viewing alerts on a map, categorizing violations, and sending notifications for critical incidents.

Sensors

The Sensors module manages Automatic Vehicle Location System (AVLS) devices and their properties. It provides tools for configuring and monitoring these devices, as well as visualizing sensor data on maps.

Master Data

The Master Data module maintains essential information such as jurisdictions, geo-fences, points of interest, and contact details. It helps organize and manage critical data necessary for fleet operations and regulatory compliance.

Reports

The Reports module generates detailed reports, including vehicle distance traveled, fuel expenses, current vehicle status, maintenance activities, and alert summaries. These reports provide valuable insights into fleet performance and cost management.

Settings

The Settings module allows for the customization and configuration of system roles, permissions, and operational parameters. It includes features for adjusting system settings, managing audit logs, and organizing organizational structures.

Why Choose Us?

Enhanced Efficiency

Our system integrates all aspects of fleet management, from real-time tracking to comprehensive reporting, ensuring streamlined operations.

Cost Savings

Optimize fuel usage, reduce maintenance costs, and improve route planning to lower overall fleet expenses.

Safety and Compliance

Ensure timely maintenance and stay compliant with regulations to enhance fleet safety and operational efficiency.

Scalability

Our solution is designed to grow with your fleet, handling increased volumes and diverse operational needs with ease.

Your Fleet, Our Expertise. Together We Drive Success.

Ready to Optimize Your Fleet?

Discover how our advanced fleet management solutions can drive efficiency, reduce costs, and enhance your operations. Our dedicated team is here to support you every step of the way.
