Technology Is Transforming Education

Gone are the days when education was a sheer matter of books and pens. The face of education has now totally changed. Information and Communication Technology has given it a new direction, a new dimension. Learnframe leverages **Information & Communication Technology** to provide comprehensive and inclusive edTech solution.

Robust Features For Hybrid Education

A new hybrid model of education is emerging, which combines the best aspects of traditional education with significant benefits of Information Technology in education. LearnFrame brings into life the values of Technology in education through our continuously improving SAAS platform.

Modern Day Educational Needs

Virtual Classes (Live)
Create virtual classrooms and conduct live online classes with audio video conferencing and chat interface.

Online Courses
Create and share online courses with video content and class notes which students can access as and when required.

Student Performance Analytics
Our powerful analytics engine performs various analysis on student performance and provides useful insights.

Tests And Exams Scheduling
All tests and exams can be scheduled and timetable will be available to the students through mobile app.

Right Time To Digitize Your Institute!

Reports have stressed the capabilities of the emerging technologies in providing institutions with a clear understanding of many things in the sector, such as tracking student progress and much more. Also, keeping in mind the differences in the learning pace of each student, edTech tools help teachers provide individualized attention to boost the capabilities and spirits of students. Reports indicate that technology in the classrooms is here for the long haul. Many institutes today believe in the capabilities of technology.

Day To Day Academic Needs

Online Attendance System
Teachers can take attendance of the students in the class through our mobile app and students see their live attendance.

Digital Notice Board
Digital notice board allows to make announcements and send push notifications to students and teachers.

Classes Timetable
Timetable can be scheduled and made available to the students & teachers in their mobile app.

Subjects & Syllabus Management
Manage and maintain curriculum details of each class, semesters and their complete syllabus.

Events Management And Calendar
Calendar of events in the institute can be scheduled in the software and all students can access through the app.

Marks & Reports Delivery Module
Our marks delivery module helps send tests results through SMS and notifications to students and parents.

Library Books Assignment
This module helps manage and track Library Books assigned to students by showing available and assigned books list.

Course Planner
Our course planner module is designed by keeping ease of use by teachers in mind. It makes planning & scheduling of the course curriculum intuitive and effective.

Polls
Conduct polls on various topics and gather opinion from students and faculties with a consolidated result interface
