e-Ayushi

Revolutionizing Healthcare

What is e-Ayushi?

e-Ayushi is one-stop digital healthcare platform designed to make healthcare more accessible, efficient, and user-friendly. From booking appointments to managing health records, e-Ayushi empowers users with seamless healthcare solutions right at their fingertips.

Welcome to e-Ayushi

In a world where innovation meets care, the Smart Health Platform stands as a beacon of advancement in the healthcare industry. Developed by Capulus Technologies Pvt Ltd, this cutting-edge solution is designed to revolutionize how healthcare providers and patients interact, ensuring seamless, secure, and efficient healthcare delivery.

Our platform integrates state-of-the-art technologies like electronic medical records (EMR), telemedicine, and health data analytics to empower both patients and healthcare professionals. With user-centric features, robust security measures, and scalable architecture, the Smart Health Platform is tailored to meet the evolving demands of modern healthcare.

Whether it's booking appointments, accessing electronic medical records, managing prescriptions, or consulting doctors remotely through telemedicine, the platform ensures accessibility and convenience at every step. It bridges gaps, enhances operational efficiency, and fosters better health outcomes for individuals and communities alike.

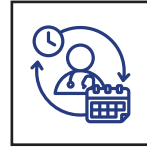

Step into the future with the Smart Health Platform – where innovation drives wellness.

Key Features

User Registration

Simplifies onboarding with an intuitive process for patients. Accessible profile management ensures easy updates and modifications. Integrates multi-language support for a diverse user base.

Appointment Management

Facilitates booking and managing both in-person and virtual appointments. Ensures timely reminders to keep users informed and on track. Provides wait-time estimates for enhanced user convenience.

Telemedicine Services

Enables secure video consultations, ensuring quick access to trusted healthcare professionals. Facilitates prescription sharing post-consultation. Supports seamless file sharing for diagnostic reports.

Electronic Medical Records

Provides centralized access to comprehensive medical records, including patient profiles, diagnostic history, and prescriptions. Ensures secure sharing of records with authorized healthcare providers.

Medicine Reminders

Helps users set reminders for prescribed medications, reducing missed doses and improving adherence. Customizable alerts allow users to set preferences for notification timing.

Patient Management

Doctors can easily manage patient information, including personal details, medical history, ongoing treatments, and previous diagnoses, all within a single platform.

Resource Management

This feature allows hospitals to manage essential resources such as bed availability, medical equipment, and staff allocation, ensuring optimal utilization and reducing operational delays.

Mobile and Web Accessibility

e-Ayushi seamlessly integrates mobile apps and web platforms, enabling users to access vital healthcare services anytime, anywhere, with exceptional ease, convenience, and efficiency.

Grievance Management

e-Ayushi allows users to report healthcare grievances via the app or web, with healthcare supervisors addressing complaints efficiently and providing timely real-time updates and resolutions.

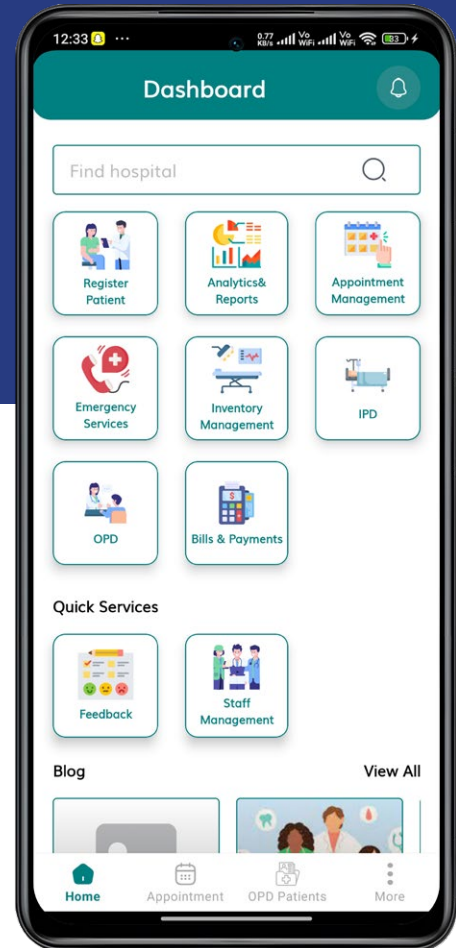

Feedback System

Allows users to share experiences and suggestions to enhance healthcare service quality. Incorporates analytics to identify trends and prioritize improvements based on user input.

The system, available on mobile and web, streamlines healthcare with easy registration, appointment booking, telemedicine, and EMR access. It includes medicine reminders, health monitoring tools, and a feedback system for better care. Seamless integration ensures accessibility and convenience for users anytime, anywhere.

Benefits

01. For Patients

- Simplified access to healthcare services.
- Improved medication adherence and health tracking.

02. For Healthcare Providers

- Streamlined patient management tools.
- Efficient telemedicine and EMR integration.

03. For Administrators

- Real-time monitoring and performance insights.
- Optimized operations with comprehensive reporting.

About the Web Application

The e-Ayushi Web Application offers a robust interface for managing healthcare services

For Patients:

The app enables users to access EMR dashboards for comprehensive health records, book appointments, and join virtual consultations with ease. Additionally, it allows users to provide feedback, ensuring a seamless and user-friendly healthcare experience, while also offering real-time updates on the status.

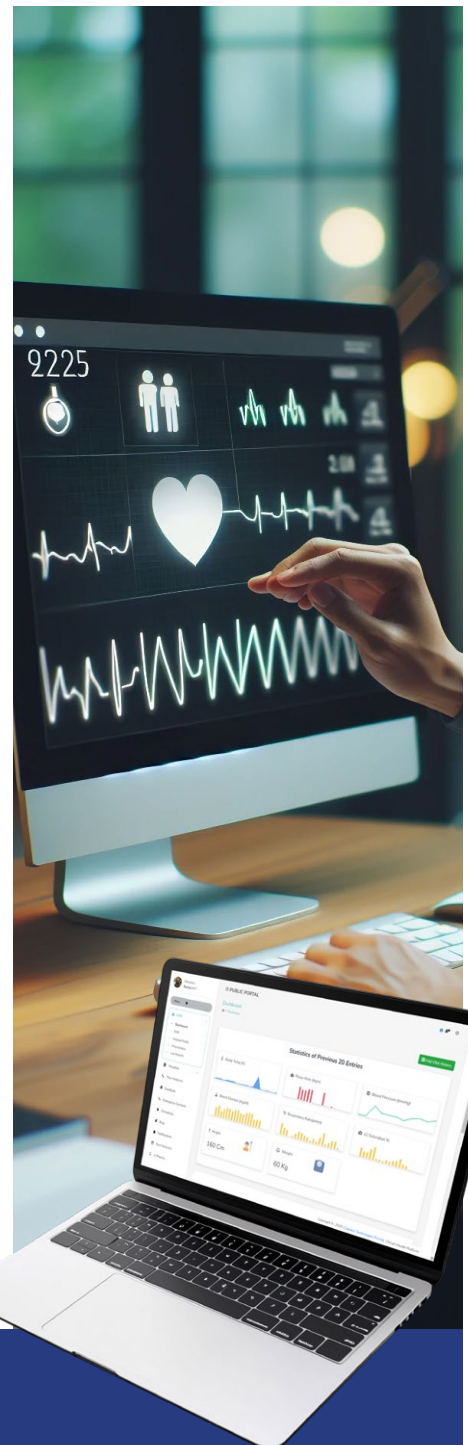

For Administrators:

The app offers real-time dashboards for monitoring operations and generates detailed healthcare metric reports for actionable insights. These dashboards provide a comprehensive view of key performance indicators, enabling proactive decision-making, operational efficiency, and data-driven improvements in service delivery.

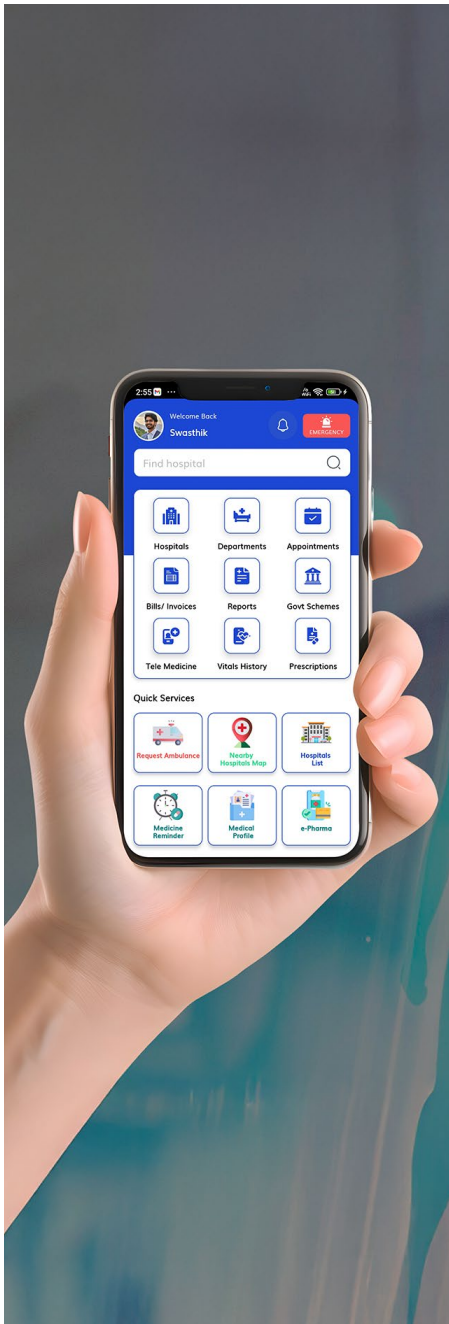

For Providers:

The app ensures the secure maintenance and updating of patient records while efficiently managing appointments, virtual consultations, notifications, reminders, personalized care plans, and seamless communication, streamlining healthcare services for both providers and patients.

The e-Ayushi Web Application offers a comprehensive platform for managing healthcare services. Patients can access health records, book appointments, and join virtual consultations. Administrators can monitor operations and generate reports, while providers securely manage patient records and appointments. Its user-friendly interface enhances efficiency and communication across healthcare services.

About the Mobile Application

The e-Ayushi Mobile App provides healthcare at fingertips:

Patient Features:

The app offers secure login with OTP authentication, appointment booking, and virtual consultation access. It includes medicine reminders, health tracking tools, grievance reporting, and status tracking, ensuring a comprehensive, user-friendly healthcare experience with personalized care, timely notifications, and efficient patient support.

Doctor Features:

Doctor features include the ability to view patient lists, manage appointment slots, and conduct telemedicine consultations seamlessly, enhancing workflow efficiency and care. Additionally, doctors can access patient records, track treatment progress, provide personalized health advice, and make informed decisions based on real-time health data.

Profile Management

Profile management features allow users to add and manage profiles for family members, enabling easy access to healthcare services and appointment scheduling. Users can also track health progress, set reminders, manage medical records, and ensure timely follow-ups for ongoing health management.

The e-Ayushi Mobile App revolutionizes healthcare by providing easy access to essential medical services right from your phone. With features tailored for both patients and doctors, it simplifies appointment scheduling, virtual consultations, and health management. Stay connected, track your health, and manage your family's profiles all in one secure and user-friendly platform.
